

MAASS JX1 PITLESS UNIT used with Plastic Casing

Why should you use a steel pitless unit on top of plastic well casing?

Steel on top gives you these advantages:

- ✓ Firm support for the pump and Pitless Adapter
- ✓ Protects top of plastic well from temperature extremes.
- ✓ Prevents sun exposure by blocking ultra-violet rays which cause deterioration of plastic.
- ✓ Protects top of well from damage.

Steel Casing and Pitless Adapter can be fabricated in your shop if state code permits.
